EDUCATION

Pacific Lutheran University

Tacoma, WA

Bachelor of Science in Computer Science | Junior

Sep. 2023 – June 2027

- **Relevant Coursework:** Data Structures, Algorithms, Object-Oriented Design, Artificial Intelligence, Machine Learning

EXPERIENCE

Proliance Surgeons

Seattle, WA

Software Engineering & Applications Intern

June 2026 – Present

- Built Python automation scripts integrating with third-party healthcare APIs to streamline data ingestion across internal and patient-facing systems.
- Queried and transformed data across SQL databases to support cross-system integration workflows and improve downstream data reliability.
- Prototyped AI-powered workflow automations with Claude to reduce repetitive manual processing in operational pipelines.

White Pass Ski Patrol

White Pass Ski Area, Lewis County, WA

Software Engineer Intern

May 2025 – Aug. 2025

- Designed and built an employee management system in React and TypeScript for 200+ patrollers, owning the UI end-to-end and reducing shift assignment time by 60%.
- Partnered with dispatchers to prototype responsive UI/UX workflows in Figma, then implemented reusable React components and interaction patterns from those designs.
- Integrated real-time data synchronization with Firebase, enabling instant updates across 200+ concurrent users and reducing data inconsistency errors by 85%.

PROJECTS

Gear Fitness 🌀 | *React Native, TypeScript, Spring Boot, PostgreSQL, AWS, Docker*

- Designed and built a social fitness app end-to-end, growing to 100+ TestFlight users; owned product design, a monochrome design system, and the full React Native frontend.
- Implemented workout tracking, social features, and in-app fitness guidance, including a muscle-activation diagram generator that renders platform-optimized workout visuals for users to share across multiple social channels.
- Architected a Spring Boot backend with 15+ REST endpoints and a PostgreSQL schema of 12+ normalized tables, keeping analytics and feed queries under 100ms.
- Deployed the app on AWS Elastic Beanstalk with Docker and GitHub Actions CI/CD, implementing Google OAuth2/JWT authentication and pre-signed S3 uploads while cutting deployment time by 70%.

Resume Optimizer Chrome Extension 🌀 | *JavaScript, TypeScript, Chrome APIs, Jina AI, Claude API*

- Built a Chrome extension that scrapes job postings, uses Jina AI and the Claude API to tailor a LaTeX resume to the listing, and compiles it to PDF with human-in-the-loop review at each step.

LEADERSHIP

Pacific Lutheran University

Tacoma, WA

President, Computer Science Club

Aug. 2024 – Present

- Founded and organized LuteHacks, PLU's first hackathon, leading logistics, judging, and sponsorship for a multi-track event focused on web and AI projects.
- Lead a 50+ member technical community by running workshops on React, AI/ML integration, and mock technical interviews.

Technology Access Foundation

Federal Way, WA

Instructor, Web Development

Jan. 2025 – May 2025

- Taught HTML, CSS, and JavaScript to 26 students, guiding front-end projects through iterative design and code reviews.

SKILLS

Languages: TypeScript, JavaScript, Java, Python, SQL, HTML, CSS

Frontend & Design: React, React Native, Figma, responsive UI, design systems, component architecture

Backend & Cloud: Spring Boot, Node.js, Flask, REST APIs, PostgreSQL, AWS, Docker, CI/CD

AI & Tooling: Claude Code, LLM API integration, prompt engineering, Git, Agile
